M-STUDIO
- 2005 - 2009** **IT Support Engineer**
Netsquare

Project Selection

Sanoma Media - Uitgeverij Van In - Laravel Developer (2019 - ...)

For this project i am an active member of the Laravel development team that works on the online educational platform “Bingel”. The application consists out of a Laravel backend and a VueJS (vuetify). All testing is done in Phpunit and we rely on an amazon AWS stack.

Colruytgroup - Teamlead CCX Webteam (2017-2019)

In this project for Colruytgroup I worked as teamlead in the webteam that managed all PHP-driven sites. colruyt.be, mijnspar.be, colruytgroupacademy.be to name just a few of them. My main tasks consisted of peer review, code management, deployment & release management, backlog & sprint management, coaching team members. All hosting was done through a fully internally managed stack.

European Commission – Drupal Digital Transformation Technical Lead (2017 - 2019)

The digital transformation team is the development team that takes care of the high profile website of the European Commission (<https://ec.europa.eu/>, <https://ec.europa.eu/commission/>, <https://ec.europa.eu/commission/commissioners/>) We work in an agile workflow with 2 week sprints and a fully functional release at the end of each sprint. Each ticket has Behat test coverage an proper documentation.

Used Technologies:

Content types, Views, Page Manager, Phing targets, Continuous Integration, CSS, PHP, Mysql, Javascript / JQuery, AJAX, GIT, SVN, Git Flow, Templates, Behat

European Commission – Drupal Multisite Development (2015 - 2017)

Development and Quality Assurance for custom Drupal modules that are being incorporated into the European Multisite setup. This platform hosts more than 200 subsites for all European directorates.

Used Technologies:

Content types, Views, Page Manager, Phing targets, Continuous Integration, CSS, PHP, Mysql, Javascript / JQuery, AJAX, GIT, SVN, Git Flow, Templates

ISW Eupora - Laravel CAS project (2017)

During this project for ISW Eupora (a KU Leuven spin-off) I built a CAS system that uses SAML to serve as a SSO (single sign on) backend for various customer facing applications.

Belisol (2012 – 2019)

Development of large scale intranet & project management application.

Used Technologies:

Content types, ECK Entities, Views, Page Manager, Custom module development, Search API, Facet API, Custom print templates (theming), PHP, Mysql, Javascript / JQuery, CSS, xHTML, Google Distance Matrix API, Project management

Development Environments:

Local MAC OSX XAMPP / Vagrant

Staging and production: Ubuntu linux and LAMP stack

Cities Alliance (part of United Nations Operations) (2014 – 2015)

Development of new public website & projects database

Used Technologies:

Content types, ECK Entities, Views, Page Manager, Custom module development for integration with other Drupal sites (web services that publish content), Migration of content (basic), Single sign on between Drupal sites through oAUTH, Custom print templates (theming), PHP, Mysql, Javascript / JQuery, CSS, xHTML, Project management

Development Environments:

Local MAC OSX XAMPP / Vagrant

Staging and production: Ubuntu linux and LAMP stack

Xenics NV – CEGEKA (2014)

Development of new public website (Team effort of Drupal team Cegeka)

Used Technologies:

Content types, ECK Entities, Views, Page Manager, Custom module development for camera specifications table rendering, Custom print templates (theming), SOAP web service implementation for support corner, PHP, Mysql, Javascript / JQuery, CSS, xHTML, Project management

Development Environments:

Local MAC OSX XAMPP / Vagrant

Staging and production: Ubuntu linux and LAMP stack

Watts Insulation NV – Quote Tool (2012 – 2013)

For Watts Insulation (part of the Watts Water group) I developed a Drupal based quote tool that allows their customers to login to the application that grants them access to a portal application to create and manage online Quotes

Used Technologies:

Content types, ECK Entities, Views, Custom modified user login, Custom module development for product imports and discounts from csv files, Custom print templates (theming), PHP, Mysql, Javascript / JQuery, CSS, xHTML, Project management

Development Environments:

Local MAC OSX XAMPP / Vagrant

Staging and production: Ubuntu linux and LAMP stack

Agoria VZW - B2B Speeddating application (2012 & 2014)

Each year Agoria organizes a B2B speed dating and networking event. For this event I developed a website that incorporates a speed dating application that allows buyers and suppliers to create a company profile and send/accept and reject meeting requests to each other.

Used Technologies:

Content types, ECK Entities, Views, Page Manager, Custom module development for automatic planning algorithm and export to csv files, Custom print templates for personalized planning (theming), PHP, Mysql, Javascript / JQuery, CSS, xHTML, Project management

Development Environments:

Local MAC OSX XAMPP / Vagrant

Staging and production: Ubuntu linux and LAMP stack
