Contribute to Bingel TMS (Planner, Care & Evaluation). A platform for teachers to schedule their lessons and for students to monitor and evaluate. This application is built in Laravel with a VueJS front end.

2015 - 2017   **PHP Developer**
ABC IT & Web Solutions, Kruishoutem
Developing tailor-made webshops and websites with an open-source Content Management System (Concrete5) and Magento.

Project Selection

SurveyAnyPlace

At SurveyAnyPlace, I work as a full-stack developer on both the Laravel API backend and the Angular Frontends. Working with large amounts of data, debugging code, and writing unit tests are part of the day-to-day operations in the scrum (agile) team that I am working in. I also made changes/improvements to the CI/CD workflow as well as released it into production.

VVGC – Vlaamse Vereniging Gezondheidscoaches

Website built in Concrete5 (PHP, SASS, and JavaScript) with an extensive registration module in which Mollie is used to handling payments. Via the "Find my coach" page you can find a coach near you on Google Maps.

LEEDUX – search engine for webinars and trainings

Via Python scripts (BeautifulSoup & Selenium) websites that offer webinars and training fully crawled to all store relevant data within a self-developed search engine. Those results are managed in a Laravel application (PHP, VueJS, Vuetify & SASS) where, via Mollie, advertisements can be purchased. All this is managed in a private Debian server on DigitalOcean.

Futurn CMS - Real estate for companies

This internally used Laravel application (PHP, SASS, JavaScript, Blade) allows employees to add, edit and delete customer requests. Via an activity log, every request is followed up closely to assist the customer as well as possible. All potentially interesting opportunities can also be managed through the application.

Nala's Friends - A non-profit organization for animal welfare

A website with a webshop made in Concrete5 (PHP, SASS & JavaScript). Showing dogs and cats for adoption, and where visitors can show interest in an animal. Via the webshop, you can support the non-profit organization, but also quickly donate via Mollie. Donations are linked to accounts, so a tax certificate is automatically issued at the end of the year, generated in a PDF format.
