Degrees

2002 - 2004	**Computer Science** Highschool Sint-maria instituut Geel
2004 - 2007	**Applied computer science** *Professional bachelor* *Specialty: Programming* Thomas More Geel

Experience

2007 - 2009	**Bosal International** *Developer*
2009 - 2012	**Intracto Group NV** Web Developer
2012 - 2013	**4 Stones** Medior Web Developer - System engineer
2013 - 2015	**Cegeka** Senior Web Developer - System Architect
2015 - 2020	**Edulogistix BV** Technical lead
2020 - ...	**Content & Coffee** Technical lead & team coach

Noteworthy Projects

GOED.be – Technical lead

In cooperation with Duke & Grace, I worked as a technical lead & team coach on the GOED project. This project involved the digitalization of all CM-platforms onto a new web application. This was a de-coupled application spanning over multiple systems, with among others, a detached frontend in Next.JS, a custom symphony based cms-platform, as well as a full backend commerce tools application, integrated with tools like D365, Actito, MediPim, ...

My responsibility was leading the team of developers, and closely coordinate technical requirements between our team, and the remote team responsible for the linked systems.

Aurubis – Technical lead

The project at Aurubis had a lot of exciting challenges in it. Setting up an entire Gitlab CI/CD workflow for various frontend and backend (Laravel/PHP) builds, implementing Test driven development and so much more!
